Frontend Developer

Work Experience

Bonbell (Rasied \$350K in funding)

Bonbell creates a comprehensive echo system for restaurants to connect to and interact with their customers through a smart, digital, restaurant-own platform.

- Built a web application for both dine-in and takeaway.
- Designed and implemented an intuitive user interface for both customers and restaurant owners.
- Integrated payment gateways for multi-payment options.

Netizens

a digital identity platform that allows users to prove anything on-chain.

- Built the web3me platform, a digital identity platform that allows users to prove anything on-chain, showcase their crypto portfolio, and display their NFT collection.
- Netizens landing page
- Designed and developed the Storyline website, which includes a puzzle game.

NFTs Lab

A comprehensive suite of tools designed to help traders and creators maximize their growth potential.

- Developed a collection generator that generates a collection and creates a smart contract and minting page without coding.
- Created a mint bot that follows predefined conditions to mint an NFT.
- Built a Smart Contract generator that enables users to create a smart contract without coding.
- Worked solo on the development of these projects.
